

Two public review documents are available for download at:  
[http://www.treecareindustry.org/Public/gov\\_standards\\_review.htm#review](http://www.treecareindustry.org/Public/gov_standards_review.htm#review)

**BSR A300 Part 1 – Pruning** is in a 45-day public review period from February 9, 2007 to March 26, 2007.

This revision features a major revision of the pruning type and specialty pruning sections. Specialty pruning has been eliminated as a unique type of pruning. Vista, structural, and restoration pruning have been incorporated as normal types of pruning.

**BSR A300 Part 4 – Lightning Protection Systems** is in a 30-day public review period from February 9, 2007 to March 11, 2007.

This public review period is for review of one additional requirement regarding system specification, otherwise ANSI A300 Part 4-2002 will not be altered in the next planned revision.

Instructions: Remember when submitting comments, or instructing others within your represented organizations to submit comments, any comment submitted to me will be treated as a public comment, regardless of the source or intention. If you are trying to solicit comments for your use at the ASC A300 meeting or to formulate your organization's position, please do not have the commenter send them to me. Once I receive it, it is a public comment and will be entered on the review document.
